

# PAKISTAN SEAFOOD

**TRADE DEVELOPMENT AUTHORITY  
OF PAKISTAN**

# TDAP INTRODUCTION

Trade Development Authority of Pakistan is the premier trade promotion organization mandated to develop and promote products and services of the country in international markets.

TDAP implements policies and directives of Federal Government and its Board of Directors for enhancing, promoting and facilitating trade.

TDAP supports and facilitates businesses through latest information and capacity building initiatives to enhance and improve their leverage in international trade.

To achieve its objectives, TDAP organizes as well as participates in local & international trade fairs, country specific exhibitions, trade delegations, conducts seminars and organizes

contacts and information exchange events both physically as well on digital platforms.

This publication is part of the efforts of TDAP to share details and showcase Pakistan's products and services in international markets.

## PRODUCT PROFILE

Fishery and fishing industry play a significant part in the national economy of Pakistan. With a coastline of about 1000 km, Pakistan has enough fishery resources that remain to be developed. It is also a major source of export earning.

Pakistan has many marine and inland fishery resources. The potential was estimated at **1 million tonnes/year** from the marine subsector alone. The commercially important resources include near

- 250 Demersal fish species
- 50 small Pelagic fish species
- 15 medium-sized Pelagic species
- 20 large Pelagic fish species
- In addition, there are also 15 commercial species of Shrimp
- 05 of Lobster.
- 12 of Cephalopods

The effect of the Indus River Delta on the marine resources of the coastline of Sindh is substantial, as this river system has been transporting enormous quantities of nutrients and sediment to the continental shelf for centuries.

Pakistan has an extensive inland water areas system, which is mainly dominated by the Indus River. These water bodies, depending on their type, possess varying potential for development of the inland and aquaculture subsectors. Inland water bodies, like dams, water locks, reservoirs, rivers, lakes and ponds cover an area of approximately **8 million hectares**.

The fisheries sector of Pakistan contributes almost **0.5%** towards the national GDP which is much less than that of its regional competitors. However, despite its nominal share in GDP, the fisheries industry of Pakistan continues to play a pivotal role earning the important export revenue.

The Fishing industry employs roughly **130,000** full-timers and **75,000** part-timers in 4 major fishing harbors with 90 percent of the catch emanating from Karachi Fish Harbor (FAO, The State of World Fisheries and Aquaculture, 2018). **There are 29 functional fish processing units, out of which 25 alone are located in Karachi.**
